THE SEVENTY-SIXTH ANNUAL MEETING OF THE ENTOMOLOGICAL SOCIETY OF ONTARIO

On the invitation of the President, Dr. George Maheux of the Plant Protection Service, Department of Agriculture, Quebec, the seventy-sixth annual meeting was held in the City of Quebec on Thursday, Friday and Saturday, November 2nd, 3rd and 4th.

The local committee consisting of Messrs. G. Gauthier, P. Lagloire, P. Morisset, R. Gobeil, H. Roy and J. I. Beaulne, under the chairmanship of Dr. Maheux, is to be congratulated on its excellent arrangements for the meetings and the entertainment of those attending. Ample accommodation for the regular sessions dealing with the reading of papers and annual business was provided by the management of the Chateau Frontenac.

The Thursday afternoon session at which the papers on Forest Entomology were presented and discussed was held at the Duchesnay Forest Rangers School and Entomological Laboratory. This arrangement gave the members a welcome opportunity to inspect the school and laboratory.

Following the papers on forest insects, an enjoyable dinner was tendered the Society by the Government of Quebec under the auspices of the Forest Rangers School, Department of Lands and Forests. Mr. Roy, Director of the School, welcomed the Society, this welcome being endorsed by the Deputy Minister of Agriculture. During the evening, Dr. Maheux spoke on Entomology in Quebec—the presidential address.

Friday afternoon, under the direction of an official guide per car, the members of the Society were taken on an interesting tour of the points of historic interest in and around Quebec City. The last point visited was the Provincial Museum where tea was served and the members had an opportunity of viewing the collection of the late Abbe Provancher.

Friday evening the members were entertained at the Chateau Frontenac with a programme of French-Canadian songs, group singing, and motion pictures.

During the meetings about forty-five papers were presented and discussed and 186 members and visitors were registered. (For papers presented see 1939 Annual Report of the Society.)
